Soy Candles

Quality, Clean, Eco-friendly

Everyone loves candles, but some don't realize the damage they're doing to their lungs, homes and environment by using candles created from byproducts of crude and lead wicks.

- Our candles are soy, which burn 50% longer than paraffin candles.
- They are virtually soot free.
- Soy candles do not get the sooty black build up on the jars like paraffin candles.
- Our candles are 100% Natural, Kosher, and created in the USA!
- Paraffin is a byproduct of crude oil.
- Our candles do not leave behind unburned wax.
- Our candles are designed for an even burn so there is no wax left over after the candle is fully burned.
- Our candles use only lead free cotton wicks.

Handmade Soaps

Our soap is high quality, like nothing you've experienced before. If you've ever used store brand hand soaps, you know that they leave your skin dry, tight, flakey. Usually you follow up with lotion. But not with our soaps. They've been tested by us personally, and many of our friends. Everyone states that they're skin is much improved, no dryness, and the exfoliating bars are great on their elbows, feet and knees.

- True premium blends of shea butter, concentrated aloe, olive oil and more.
- Each bar is made with quality essential oils and herbs.
- Cold process soap: these soaps are made from scratch with high quality vegetable based ingredients, from raw ingredients, no glycerin or shaped soaps here, novelty soaps are cute, but not good for the skin.
- Reputable sources for raw materials—no shady distributors.
- Made in the USA.
- No animal testing!
